Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, 8-19, 21-32, 34-44, 46, 48-56, 58-65, 67-68, 70-71 are drawn to rotation of a human body in response to a user's input, classified in class 345, subclass 649.
- II. Claims 72-74, 76-85, 87-92, 93-95, 97-105 are drawn to user's interface for mapping the input to a body surface coordinate system, classified in class 345, subclass 156.
- III. Claims 106-123 are drawn to operator interface (e.g., display with control), classified in class 700, subclass 17.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the Invention III is a user interface does not require the rotation of invention I or mapping of invention II. The subcombination has separate utility such as the rotation of invention I and the input mapping of invention II.

The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all

Art Unit: 2628

the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Claims 26-32, 34-44, 46, 48-49, 83-85, 87-92, 112-117 are rejected under 35 U.S.C. 101 because the claimed invention is not supported by either a positive asserted utility or a well established utility.

The claimed "computer readable medium" is not specifically defined within the claims; it can be reasonably interpreted as "communication media, transmission medium, signal" which are non-statutory under 35 USC 101.

Claims 26-32, 34-44, 46, 48-49, 83-85, 87-92, 112-117 are also rejected under 35 U.S.C. 112, first paragraph. Specifically, since the claimed invention is not supported by either a positively asserted utility or a well established utility for the reasons set forth above, one skilled in the art clearly would not know how to use the claimed invention.

The original disclosure does not specify what is the claimed computer readable medium.
